R. Refi Ahmad Fauzan

Graduate of SMKN 1 Katapang

About Me

I'm a Vocational High School graduate in Computer Software Engineering, with a focus on Ruby on Rails web development. With 3 months of internship and 4 months of freelance experience, I've delivered high-quality software and solved complex technical problems. I'm passionate about creating innovative web applications and committed to continuous learning.

Portofolio

- **PT. Supirin Indonesia Maju | Freelance**
  Project   : Supirin
  Role   : Junior Ruby on Rails Developer
  Technologies Used : Ruby on Rails, postgreSQL, sidekiq, Redis, Flutter

  Supirin is an online passenger transportation aggregator is not a taxi service and is not involved in the relationship of Users. My responsiblities included solving bugs and building new features based on tickets on Github workflow by the tech lead. The project is currently maintained by PT. Supirin Indonesia Maju at https://supirin.id

- **PT. Basicteknologi Intersolusi Tersinergi | Internship**

 **Project**   : PDAM Boyolali Finance
  Role   : Fullstack Web Developer
  Technologies Used : Laravel, MySQL, Bootstrap

  PDAM Boyolali Finance Management Website is a finance management website for a water utility company. My responsibilities included showing data from the back-end to the view. The project is currently maintained by PT.Basicteknologi Intersolusi Tersinergi.

- **PT. Basicteknologi Intersolusi Tersinergi | Internship**

  Project   : Basic School
  Role   : Fullstack Web Developer
  Technologies Used : Laravel, MySQL, Bootstrap

  Basic School is a learning platform focusing on IT development to improve IT in Indonesia. In this project, I worked as a full-stack web developer, implementing new features and layouts. The project is currently maintained by PT. Basicteknologi Intersolusi Tersinergi at https://school.basicteknologi.co.id

• Freelance Project
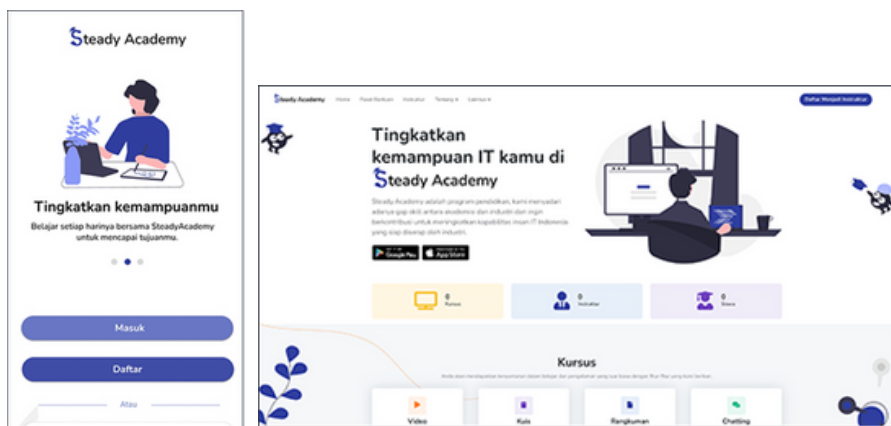

Project   : Central Acrylic
Role   : Fullstack Web Developer
Technologies Used : PHP native, MySQL, Bootstrap

Central Acrylic is an ordering website for orders made for machines. This project was given to me by a college student who needed a website for his thesis. I built the entire project from scratch. This project is hosted on http://central-acrylic.my.id
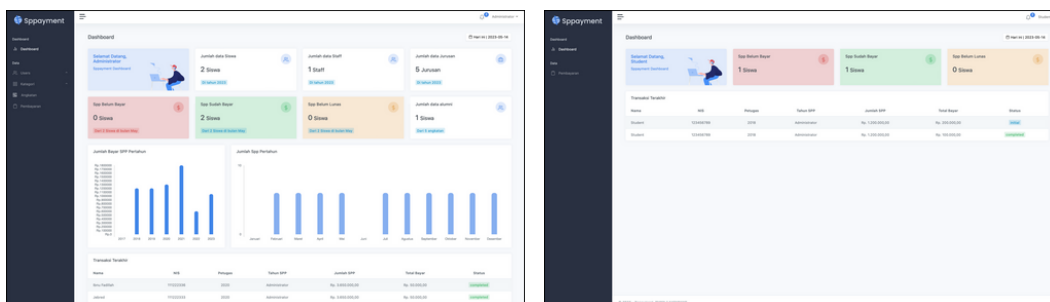

• School Project

Project   : Steady Academy
Role   : Fullstack Web Developer & Flutter
Technologies Used : Laravel, Firebase, Bootstrap, Livewire, Flutter

Steady Academy is a learning management website that provides users with access to educational resources. That project was Inspired by Udemy and BasicSchool and was build to help friends who had difficulty learning due to the pandemic. I led a team of 6 members and was also responsible for helping with Flutter for the UI. The repository project is on my github at https://github.com/Djebreds

• School Project

Project   : SPPayment
Role   : Fullstack Web Developer
Technologies Used : Ruby on Rails, MySQL, Bootstrap, Midtrans, AJAX

SPPayment is a web-based payment system that simplifies school fee payments for parents. It offers a user-friendly platform and a range of payment options, making it easier to pay school fees online. The repository project is on my github at https://github.com/Djebreds
